

RAJVEER JAT, PhD

Quantitative Researcher, Western Digital | Lecturer (Financial Economics), UC Berkeley | PhD Econometrics
San Jose, CA | (951) 573-0953 | rjat001@ucr.edu | [linkedin.com/in/rajveeriitr](https://www.linkedin.com/in/rajveeriitr) | rajveerjat.com

SELECTED RESEARCH

- "[Kernel Three-Pass Regression Filter](#)": a *long-horizon forecasting* method that beats competing methods on 75% of 176 macro series (FRED-QD dataset). [Award-winning paper, The 2025 World Congress of the Econometric Society].
- "[Sufficient Instruments Filter](#)": deep-learning based method for *causal inference* in high-dimensional, noisy macro-finance set-up. In a CAPM application on a popular ETF, uncovers a true beta of 1.51 versus a naive OLS estimate of 1.05, a 44% higher systematic risk exposure, rejecting the null of $\beta \leq 1$ at 99% confidence. [Accepted, California Econometrics Conference 2025 and European Meeting of the Econometric Society 2025].
- "**Macro Factors Are Underrated: Bond Risk Premia Revisited**": overturns the consensus that macro factors play a secondary role to Cochrane-Piazzesi financial factors in explaining bond risk premia. [Accepted, 2026 North American Summer Meeting, Econometric Society].
- "[The Agricultural Productivity Gap: Informality Matters](#)": applied non-parametric modeling to overturn conventional wisdom on a long-standing question in development economics. [Accepted in JDE, the best sub-field journal in economics (2026)].

EXPERIENCE

UC Berkeley, Dept. of Economics – Incoming Lecturer, Financial Economics (Econ 136) *Jun 2026-present*

- Teaching asset pricing, fixed income, portfolio theory, and factor models to senior undergrads, alongside full-time industry role.

Western Digital – Quantitative Researcher / Data Scientist, San Jose, CA *Jun 2025 – Present*

- Lead quantitative research on demand and market-intelligence signals in semi-conductor tech space to support enterprise-level strategic decisions – directly analogous to systematic signal research in investing.
- Build forecasting and risk models using supervised factor models, nonlinear signal extraction, and sufficient dimension reduction – the same toolkit used in the bond-risk-premia research above.
- Apply causal inference and structural econometric methods to isolate true business impact from confounded observational data.
- Lead technical research on high-value opportunities leveraging agentic AI and Design of Experiments.

RTI International – Consultant *Jul 2021 – Sep 2021*

- Developed statistical models projecting future cash-flow streams to support a \$10M investment decision.

Asian Infrastructure Investment Bank (AIIB) – Consultant *Nov 2019 – May 2021*

- Built mathematical and statistical models guiding optimal-solution analysis for urban planning investment decisions.

KPMG, India – Research Intern *Jan 2020 – Aug 2020*

- Solved an expected-revenue estimation problem using a constrained optimization framework in Python.

HCL Technologies India – Software Engineer, *Oct 2016 – Jul 2017*

- Developed object-oriented software solutions for enterprise business problems.

EDUCATION

PhD, Economics (Econometrics), University of California, Riverside *June 2025*

-Served as the Head of Graduate Quantitative Methods Center at University of California (UC), Riverside for 2024-25.

MS, Quantitative Economics, Indian Statistical Institute, Delhi *May 2019*

-Academic Distinction at Indian Statistical Institute for meritorious performance in Masters degree.

B.Tech, Electrical Engineering, Indian Institute of Technology (IIT) Roorkee *May 2016*

TECHNICAL SKILLS

Languages/Tools: Python, R, SQL | **Methods:** Factor models, nonlinear signal extraction, sufficient dimension reduction, causal inference, structural econometrics, time-series forecasting, deep learning for causal estimation, kernel methods, non-parametrics.

HONORS LEADERSHIP & AWARDS

- Youngest member of the organizing committee, Annual Economics Conference, Indian Statistical Institute (2025).
- USD \$2,000 Fellowship, The 13th World Congress of the Econometric Society (2025)
- Dean's Distinguished Fellowship, UC Riverside (2020); Outstanding Teaching Assistant Award, UC Riverside (2025)
